## **DETAILED ACTION**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a lighting circuit to operate a discharge lamp with a bi-pin base having, inter alia, a bypass circuit which comprises passive electronic devices or a pair of diodes coupled in parallel and opposite directions, that are relatively inactive when the filament is in working condition and that become active to allow continued starting and lighting of the discharge lamp when the filament is broken (claims and 1 and 9); or a method for extending the life of a discharge lamp comprising the step of coupling a redundant circuit comprising passive components across terminals...wherein the redundant circuit is normally dormant but provides a conductive path between the terminals after the cathode wears out (claim 5). The remaining claims 2-6, and 8 are allowed by virtue of their dependencies on the independent claims. Hence, the examiner has allowed claims 1-6, 8 and 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
